

# Key Driver Diagram (Learning Structure)

## Aim

**AIM:** Goal of the project:  
“What are we trying to accomplish?”  
**S.M.A.R.T**  
S = Specific  
M = Measurable (Outcome)  
A = Actionable  
R = Relevant  
T = Time bound

## Key Drivers (Measures)

**Key Drivers:** Identified components of the system or process that are vital to achieving the **Aim**

## Design Changes/Interventions

**Interventions:** Change concepts that impact **Key Drivers**:  
“What changes can we make that will result in improvement?”

**Measures:** A means to quantify the **Aim** and **Key Drivers**;  
“How will we know that a change is an improvement?” Identify **process** and **outcome** measures
