

OUR SUCCESS

Making sure Ohio moms and babies get the best care before and after birth.

30%

reduction in late onset bacterial infections in premature infants

75% reduction in early deliveries, 66,000 births shifted to full term between 2008-2016

>90% antenatal steroid administration verified for women at risk for imminent preterm birth

9,600+

infants born exposed to opiates received standardized, compassionate care in Ohio

Reduced avoidable readmissions within 7 days of discharge for infants with complex conditions
